

## HEADER

This is what your body copy could be. It's a classic sans serif font, so it matches your logo quite nicely. All in all, it's a very modern look that feels sleek and minimal. A great contrast to the option on the left. By the way, this is what it **LOOKS LIKE BOLD**, and this is what you would *see for italics*. I'm going to type a little bit more for length.

## USE THIS FONT FOR FUN AND BOLD DETAILS

---

*a fun script*
